

GUZI TABLE + GETA SLIPPERS

Due by April 19 - 21

THE GUZI TABLE

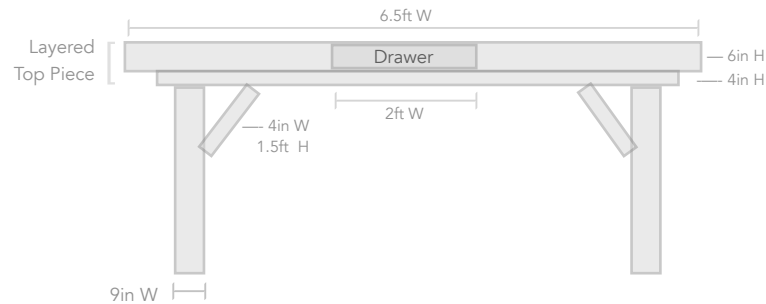

The GUZI is a large table /platform

6ft 9in H x 2ft W x 6ft L

It's an upgrade on an original design so it has some extra layers to add some flair & stability

Example:

- an addition of 2 "feet" to the front & back of the bottom to prevent it from tilting forward/back
- the top piece is layered into 2 pieces to add more definition to the design. (6.5ft L & 6ft L)

THE LADDER STEP

an addition of a ladder run like step 2.5ft H between the legs.

the steps are in between the legs width (2ft) & are added assistance to get the subject on top of the object. They act as ladder runs, but they don't need to be up the entire height of the table.

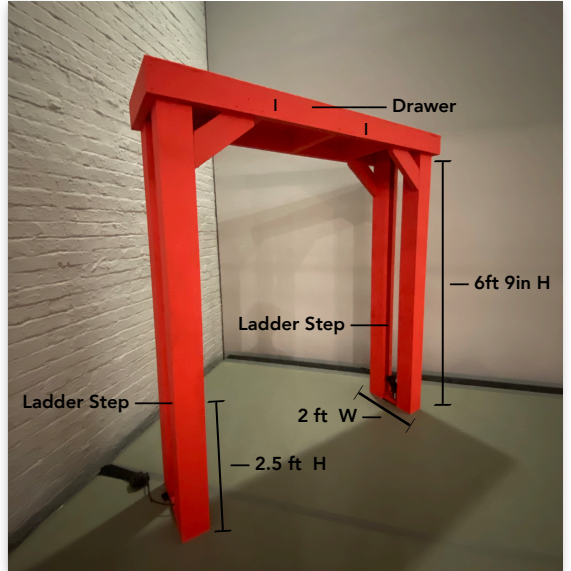

there would just be one "run" at 2.5ft so it's a little boost.

THE DRAWER

6in H x 1.5ft L x 2ft W

push-to-open drawer in the center of the beam

this drawer would not have a handle & utilize hardware similar to [this](#)

THE GETA SLIPPERS

1.5ft H x 9in W

2 rectangle boxes to attach to shoes

the shoes are actually attached via drill & large washer plates

they are worn & dragged in the space but not effectively "walked in"
